

## AUDIO VIDEO DESIGN WINS GOLD CoTY FOR TASTEFULLY DISCREET PROJECT

IFDA-NE members Audio Video Design took home a 2016 EM NARI Gold CoTY (Contractor of the Year) Award for Residential Specialty Interior for a project in Needham which they worked on with Fallon Custom Builders.

The home is fully integrated, making life in a large house easier with automated lighting and dimming, electric shades and skylights, and invisible speakers, all of which are controlled via the Savant platform using smart phones or tablets. Additional project features include a communication system that provides full intercom and paging capability, garage door integration that can view, check status, and operate doors, and a surround sound system and media storage in the family room.
